Programmer Analyst II (12 Month Contract)

TRIO (Translational Research in Oncology) is a not-for-profit clinical research organization that is dedicated to advancing translational cancer research by pursuing forward innovative and targeted therapeutic concepts in the clinical trial setting. We are committed to providing treatments of the future to the world of today.

TRIO is looking for a Programmer Analyst II to join our Information Services team in the Edmonton office for approximately a 1 year term.

TRIO's head office is in Edmonton, Alberta although the organization has operations all throughout Canada, the USA, France and Uruguay. The main objective of the Information Services team is to translate user's business problems into analytical terms, participate in the design and implementation phases for the solutions, as well as supply users with the support and understanding to use the systems.

RESPONSIBILITIES:

For this 12-month term position, 80% of the time will be focused on:

- Develop reports, functions and procedures based on requirements specifications.
  - Work with the business on the development of specifications.
  - Perform peer code reviews.
  - Write test scripts for own development efforts; execute test scripts for peer development efforts.

The remaining 20% of time will focus on the following responsibilities:

- Assist IT with their testing efforts, including installation qualification validation testing efforts associated with Clinical systems.
- Create and maintain global functions under the guidance of senior staff members.
- Configuring validations and derivations procedures in the Clinical applications as needed.
- Participate in the development of Policies, Standard Operating Procedures and Instruction Manuals and follow those to ensure the security and integrity of the company applications and databases.
- Close working relationships with application teams and users in the design, development, tuning, and problem resolution of database and applications services.
- Provide assistance (as required) with the Clinical application systems, including technical support during the implementation, maintenance and migration phases of the project.
- Occasional evening and weekend support as required.

QUALIFICATIONS:

- Post Secondary Diploma or Degree in Computer Programming
- At least 3 years of experience in application programming role.
- Demonstrated experience with C# programming language is required.
- Experience with SAP Business Objects OR experience with Crystal Reports is required.
- Excellent computer skills and a good understanding of networking technologies.
- Very good understanding of relational database concepts.
- Demonstrate attention to detail, accuracy and thoroughness.
- Strong communication skills & good people skills are required.

- Ability to work well under pressure and with others.
- Industry certifications would be an asset.
- Exposure to Medidata (Rave) Clinical Platform would be a strong asset.
- Programming experience in browser-based languages would be taken into consideration.

What we can offer you:
- Competitive salary
- 3 weeks of vacation
- Flexible working hours
- Life, health, & dental premiums paid by TRIO
- Monthly transportation allowance

If this sounds like the opportunity you have been seeking please forward a cover letter with your resume, by email, to: human.resources@trioncology.org **Please include your salary expectations in your cover letter.** Please quote requisition number **19-10** in the subject line when applying.

We thank all candidates for their interest; only those selected for an interview will be contacted.
